>  
> The Town Hall Meeting was well done and very successful for the local and state agencies . They have accomplished a lot in 5 days and the local community seems appreciative .

>  
> The legacy paper mill in town is in the crosshairs . Numerous owners over the decades and now a languishing Brownfield . Local citizens have lots of stories about it . MDEQ is beginning to look at PFAS in a network of historical monitoring wells around the site . Lots more to come on that .

>  
> Private well sampling program is up and running , but no results are in yet . MDEQ has indicated that point- of-use filters will be provided as temporary fix for private wells with hits over threshold criteria.

>  
> Parchment system is currently pressurized with Kalamazoo water . Projection is that it might be ready for use by Parchment next week following additional PFAS and standard chemistry verification work.

>

> Leader of the Governor's state task force ( MPART) sought our perspective ( off-line) on how to treat PFAS in municipal wells at the source. They realize that as they complete public water supply testing, they may have a situation where there is not a neighboring community supply they can tap into . We anticipate they'll be contacting us to discuss this further -soon . Their interest is in availability and cost. Jeff and I will try to gather some information to be ready if they do. Our perception is that they are seeking technical advice on this , as opposed to wanting us to do it .
